

# Planning and Distribution manager, Acarix A/S

**Acarix is looking for a Planning and distribution Manager to support our rapid growth and global expansion of our innovative CADScor®System.**

We are looking for an experienced Planning and distribution manager who is seeking to join a medical technology startup company, with the potential to have significant impact on patients and health care systems worldwide.

You have experienced with forecasting, inventory management, production planning, ERP systems and can ensure global distribution using an outsourced warehouse setup. You thrive on working in a fast-paced environment, juggling many balls and handling high complexity. You are a highly pro-active/solution-oriented person with versatility to shift from strategic level to "hands on" execution. You enjoy international environments and cross-functional teamwork. You are fluent in English. You would like to be part of an engaged and passionate team in a straightforward, open, transparent and collaborative atmosphere.

## Key responsibilities:

- Lead planning and distribution including
  - Forecasting
  - Inventory planning
  - Purchase components
  - Manage direct communication with suppliers
  - EOL/NPI calculation
  - Freight
  - Masterdata
  - Warehousing (outsourced)
- Drive and coordinate the supply chain related part of a new ERP system

## Qualifications

- We expect an ambitious candidate who has a consistent track record of excellent achievements
- Minimum of 3 years of relevant work experience within Supply Chain and especially within forecasting and planning, preferably within med-tech
- Experience working closely with European and US distribution
- Fluent in English both oral and written
- Experience in structuring data and working with Excel and ERP systems
- Best in class candidate with minimum a Master degree within technical fields and/or business
- Strong team player with excellent interpersonal skills
- Strategic outlook with focus on execution and "hands on"
- Detail oriented with ability to organize, plan and track
- Systematic, structured, analytical and result oriented.
- Independent, driving projects and following up
- Excellent communication and presentation skills
- Actively demonstrating highest level of professionalism, ethical behaviour, compliance, and integrity

## What we offer:

We're an informal, flat organization and for the right candidate we offer a position with autonomy and mandate. The distance from idea to execution is short. We offer a very hands-on position focused on developing and executing our global planning and distribution strategies. Focus markets are US and Europe.

The planning and distribution manager will report directly to the COO and will work in close cooperation with the other members of the Operation Team as well as other key internal and external stakeholders.

The position is based in Hellerup, Denmark.

International travelling of approximately 10-20 days/year is expected.

### **Want to know more?**

We expect you are fast paced and thus will be able to send your application within 2 weeks by 31/3-2021  
Please send your application and CV to [Thomas.lundstroem@acarix.com](mailto:Thomas.lundstroem@acarix.com)

If you want to know more about the position you are welcome to contact COO, Thomas Stig Lundstrøm,  
[Thomas.lundstroem@acarix.com](mailto:Thomas.lundstroem@acarix.com) or phone (+45) 2082 0120

### **About Acarix:**

Acarix offers the CADScor®System, an innovative, non-invasive, ultra-sensitive analytical medical device. After receiving the CE-mark, Acarix was listed on Nasdaq First North Premier in 2016 and in 2020, Acarix was approved by FDA further supporting the great growth potential of the CADScor®System designed to support a safe, reliable and cost-effective rule-out of significant coronary artery disease (CAD).

Our vision is to create a paradigm shift in the early diagnosis and assessment of cardiac and vascular diseases. Overall, we are working on making sure that everyone, be it a health care professional or a patient, who wants or needs a CADScor®System assessment, should be able to get one in a timely manner.

Our mission is to be the world leader in AI-based rapid diagnostics of coronary heart disease. We will continue to develop the CADScor®System to listen to millions of hearts to reduce human and health-economic burden in the diagnosis of CAD. It is further our mission to develop additional acoustic medical technologies, primarily in the field of cardiology.

Our strategy is to develop and provide a non-invasive, quick, reliable diagnostic aid for healthcare professionals investigating patients with symptoms related to coronary artery disease. Our CADScor®System is intended to be used early in the diagnostic pathway to easily rule out those patients at low risk, giving patients peace of mind, and recommending those patients at elevated risk to undergo further evaluation. By providing CADScor®System to internal medicine and cardiologists, we intend to establish a new market segment where CAD can be ruled out early, in first line contact. The CADScor®System is sold to clinics, hospitals, and integrated health network systems, in combination with individual, single-use RFID patches, to which the actual ultra-sensitive microphone is attached, and a patient risk assessment can be performed.

These diseases are characterized by vague and non-specific symptoms, whose connection to the cause cannot be detected without comprehensive diagnostic testing.

By providing a tool for general practitioners and cardiologists, Acarix works to establish better options to help rule out CAD early.

The CADScor®System is sold to clinics at minor capital investment, in combination with the disposable single-use patches, to which the actual ultra-sensitive microphone is attached.

Our global office is in Malmö, Sweden, our working language is English, written and verbal.
